

Setting Future Standards **HVTT12**

Stockholm, Sweden, 16-19 September 2012

- Vehicle-Infrastructure Interaction
- Road Safety
- Energy and Carbon Footprint
- Implementing ITS
- Innovative and High Productivity Vehicles
- The Transport Tasks – Policies, Logistics and Co-modality
- Road Network Performance

HVTT12

Stockholm 2012

Welcome!

The 12th International Symposium on Heavy Vehicle Transport Technology (HVTT12) is presented by the International Forum for Road Transport Technology (IFRTT). The aim is to provide a forum for discussions and the exchange of ideas amongst legislators, road administrators, academics and consultants, vehicle manufacturers and suppliers, transport organizations and transporters.

HVTT12 is organized under a global initiative by the IFRTT, with the Nordic Road Association working group "NVF Vehicles and Transports" as local host. We are expecting delegates from all six continents, with over 50 technical papers for presentation and discussion. Extended abstracts to be submitted by Nov 1st 2011. There will be four plenary sessions as well as a stimulating evening programme to facilitate social contact, with informal get-togethers and a conference dinner.

Visit www.hvttconference.com for further information.

We look forward to meeting you in beautiful Stockholm in September 2012.

Paul Nordengen, President IFRTT

Johan Lindström, Chairman HVTT12 Organizing Committee

Anders Lundström, Chairman HVTT12 Scientific Committee

HVTT12 is supported by

HVTT12 partners
